The foregoing statement of Assets and Liabilities of the "Proexix" is presented to the careful persual and scrutiny of our patrons and the public generally feeling confident it cannot fail to impress upon the minds of all, the entire reliability, solveney, and healthy condition the Company is in.

The "Proexix" was incorporated by the Legislature of Connecticut, under a "perpetual charter," with a Cash Capital of Two Hundred Thousand Dollars. Since its organization the Company have been doing a large, and, on the whole, a prosperous business, throughout the several States of the Union; and the manner in which the affairs of the Company have been managed, has inspired unusual confidence in the minds of the public towards the "Proexix," so that our Policies are readily sought after. Honorable dealings, liberal and satisfactory adjustments, and prompt cash payments of all fair losses, are principles in the transaction of our affairs; and we intend so to administer our business in the future, as not only to gain, but retain, the good will, esteem, and patronage of the public.

Rates or Parshtuss are as low as undoubted security and prompt indemnity to patrons will warrant. We cannot, nor is it our intention, to compote with "Wild Cat" companies, whose whole object and desire is to get money—without for a moment imaging that every policy a Company issues is an obligation, to which they may at any moment be called to respond. No intelligent, candid, thinking person will refuse to pay a Company a "living" rate, provided he is certain the Company is "sound to the core." We are of that denomination, as the above statement of the Company fully and clearly proves. Dwelly a Property insured at Low Rates for 1, 3 or 5, are.

GENESEE STREET. TAVE IN STORE AND WILL CONTINUE

We have labored to find, and have found, an

Ayer's Ague Cure, which neutralizes this malarious poison in the bleed, and stimulates the liver to expel it from the body.—As it should, so it does cure this afflicting disorder with perfect certainty. And it does more, or rather does what is of more service to those subject to this infection. If taken in season it expels it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system in health although exposed to the disease. Consequently it not only cures, but protects from, the great variety of affections which are induced by this malignant influence, such as Remittent Fever, Chill Fever, Dumb, or Masked Ague, Periodical Headache, or Bilious Headache, Bilious Fevers, Neuralgia, Rheumatism, Gout, Blindness, Toothacke, Earache, Catarrh, Asthma, Palpitations, Palarid Affections of the Spleen, Hysteries, Colic, Paralysis, and Painfal Affections of the Stouach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "Agus Cure" removes the cause of these derangements, and cures the disease.

This it accomplishes by stimulating the excretories to expel the virtus from the system; and these organs by degrees become habited to do this their office of their own accord. Hence arises what we term acclimatation. Time may accomplish the same end, but often life is not long onough, or is sacrificed in the attempt, while this "acue Cure" does it at once, and with safety. We have great reason to believe this is a surer as well as ander remody for the whole class of diseases which are caused by the miasmatic infection, than any other which has been discovered; and it has still another important advantage to the public, which is, that it is cheap as well as good.
